DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prior art (figs. 1-2,10, of the application) hereinafter 'PA in view of Treczka et al. (US 4233580).

Art Unit: 2834

Regarding claims 1,8, PA discloses all the aspect of the claimed invention as listed elements in previous action.

PA fails to disclose at least one air gap positioned circumferentially between the two circularly-shaped segments.

Treczka et al. disclose at least one air gap positioned circumferentially between the two circularly-shaped segments (8', see fig. 2).

PA and Treczka et al. are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the other. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify and rearranged the journal of PA to accommodate the air gap as taught by Treczka et al. in order to improve the structure in operation.

Regarding claims 2-7,9-17, PA disclose all the claimed features (see background description of the application).

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory

Art Unit: 2834

period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
